

Schoolwide Benefits of Using Remind

OVER 35% OF K–12 TEACHERS in the US, and 1.5 million teachers globally, use Remind to connect instantly with students and parents. By making it easier to send assignment reminders and schedule updates and motivational messages, Remind aims to help teachers make a huge impact on students—in fact, over 80% of teachers that use Remind say that the product has positively impacted their teaching.

Over time, we've also seen countless administrators benefit from Remind for school-wide communication. Principals everywhere are forgetting their complex phone trees and are using Remind as a simple way to keep their colleagues in the loop and build community at their schools.

Remind is safe, simple and free

PERSONAL PHONE NUMBERS ARE NOT SHARED

Remind messages are not sent from personal cell phone numbers. Students and parents who sign up to receive messages from their teachers will never gain access to a teacher's personal cell phone number, nor will the teacher have access to a student or parent's cell phone number.

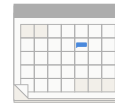

Remind does not rent or sell any user data, ever. Remind is also COPPA compliant, and uses standard encryption methods, such as SSL, to protect user information. We take student data privacy seriously, and work hand-in-hand with our community to keep Remind safe and secure. You can reference these documents to understand more about our policies:

Top five ways Admins use Remind

01 / Update parents about school-wide events and schedule changes

02 / Celebrate the great work going on in classrooms with photos and motivational updates

03 / Send staff timely reminders in real-time instead of weekly newsletters

04 / Share Professional Development tips with your staff

05 / Communicate important messages about testing, school values, or community-building with the student body.

SAVE VALUABLE TIME

Announcements: Teachers update students and parents in seconds regardless of which device they use. By sending quick Announcements to their entire class using the app or website, everyone is in the loop.

Chat: Teachers can also choose to initiate safe, personalized conversations with individual students or parents. Remind Chats can be paused & resumed at anytime and teachers can set Office Hours so they stay in control of their messages.

EASILY REVIEW MESSAGE HISTORY

A transcript of all Announcements and Chats is available at any time. These messages can never be edited nor deleted. This means an accurate communication history will always be available for reference, which is great for communication logs and general audit requests!

As a verified Administrator, you have access to Teacher accounts when they are linked to a school site. This gives you the ability to manage the subscriber list, export message history and/or delete the account if needed. You can request access using [this form](#).

USE FREELY

Remind is completely free to use for teachers, students, and parents. Standard text messaging rates* apply to those receiving messages (based off each individual's messaging plan and cell phone carrier), but there are no added costs. In other words, receiving a Remind message is exactly the same as getting a text message from a friend.

There are no ads and Remind doesn't sell any information.

**Note: SMS is only available in the US and Canada.*

“ Using Remind allows me to keep my students and their parents up-to-date with exactly what's going on in class.

Todd Nesloney, **PRINCIPAL**

”

Adam Welcome, Principal, of Montair Elementary uses Remind as a part of his curriculum. See Remind's impact on the school.

Try it today!

Remind is fast and easy to set-up. Teachers, students and parents do not need smartphones, and can choose to subscribe to Remind messages via text, app or email.

If you're a Google school, encourage teachers to use the Google Connect button to quickly set up their accounts using their school domain.

Remind is a great way to engage students, involve parents, and improve communication between home and school.
